# Testing and Education Reference Center

Peterson's Practice Test Plus

Several new features are coming to the test-taking experience within TERC. These enhancements are currently available for preview within the DSST exams. Exams will be migrated to the new experience on a rolling basis, with the migration concluding at the start of 2019. Users will have access to both experiences for approximately 30 days after each exam migrates.
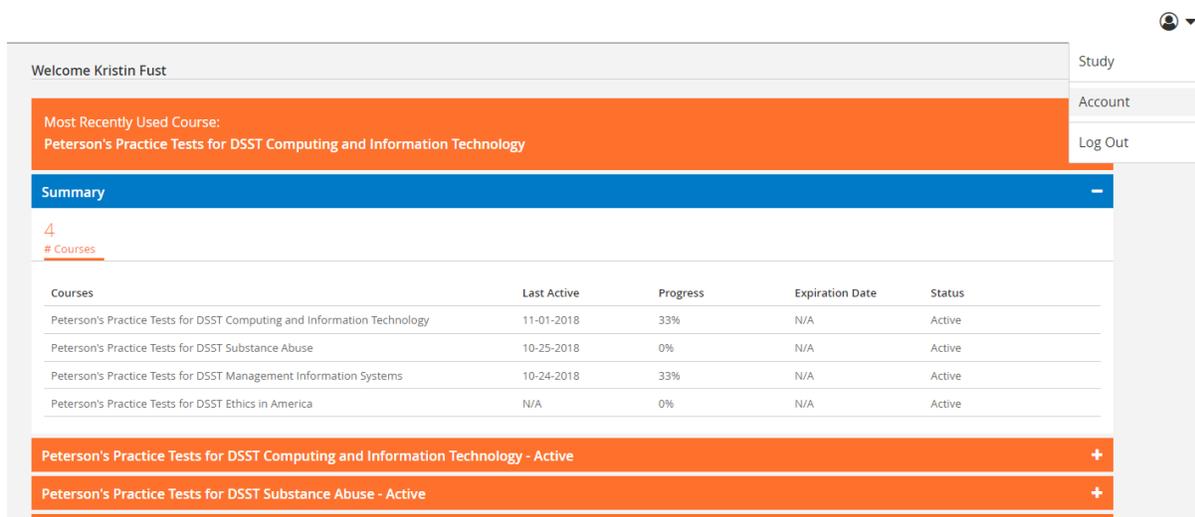

New features include:

- **Study plan**: TERC's new Study Plan lets users input their actual test date and then provides a custom dashboard to help them track progress against their goals.
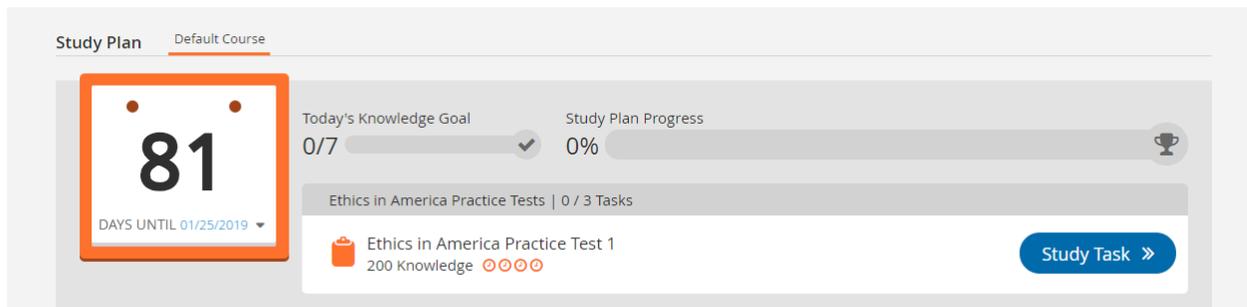

- **Reset tests:** Users can now reset and retake practice tests! The new platform removes the limitations on how many times a test can be taken. The option to reset exams is available in the user dashboard.

- **Account view:** Practicing for multiple exams? The Account page gives users an at-a-glance view of all tests currently in progress. Users can find the Account page by clicking on the user icon in the upper-right corner.
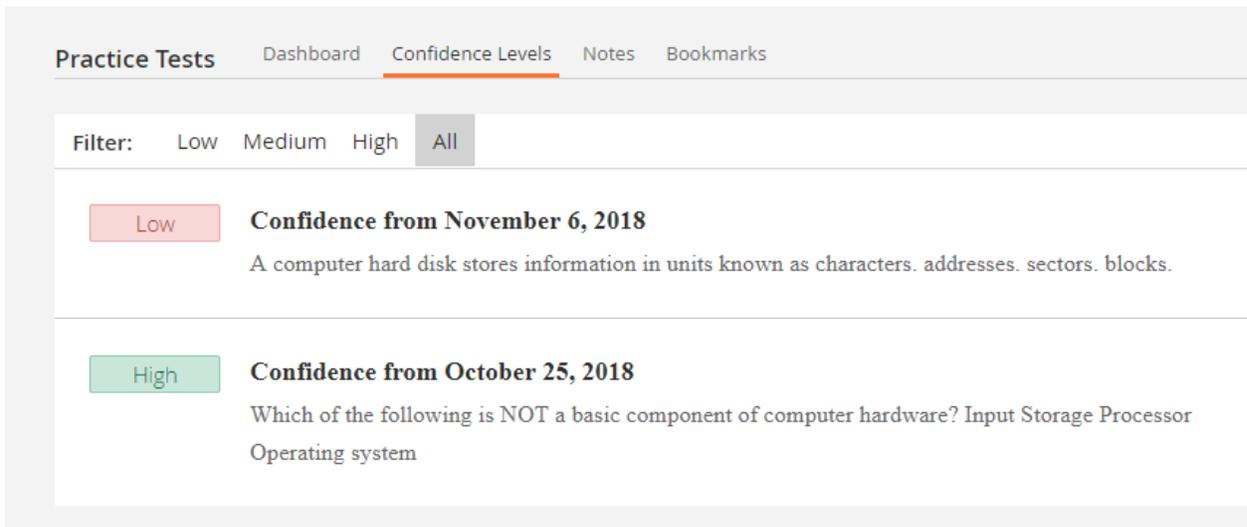

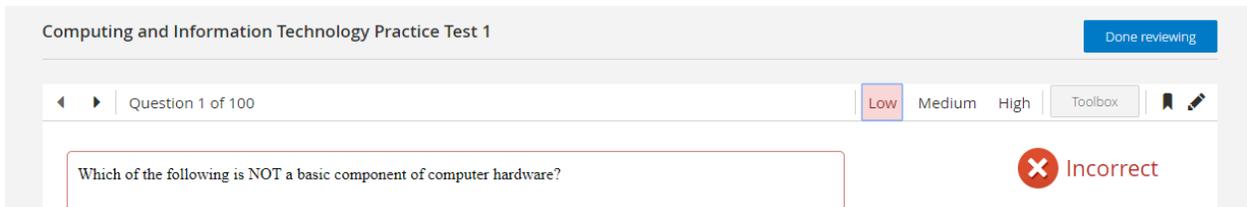

- **Revisit later:** Stuck on a hard question, or not confident in an answer? The "Revisit Later" function flags questions for users to easily revisit during their final answer review.

Complete a study plan
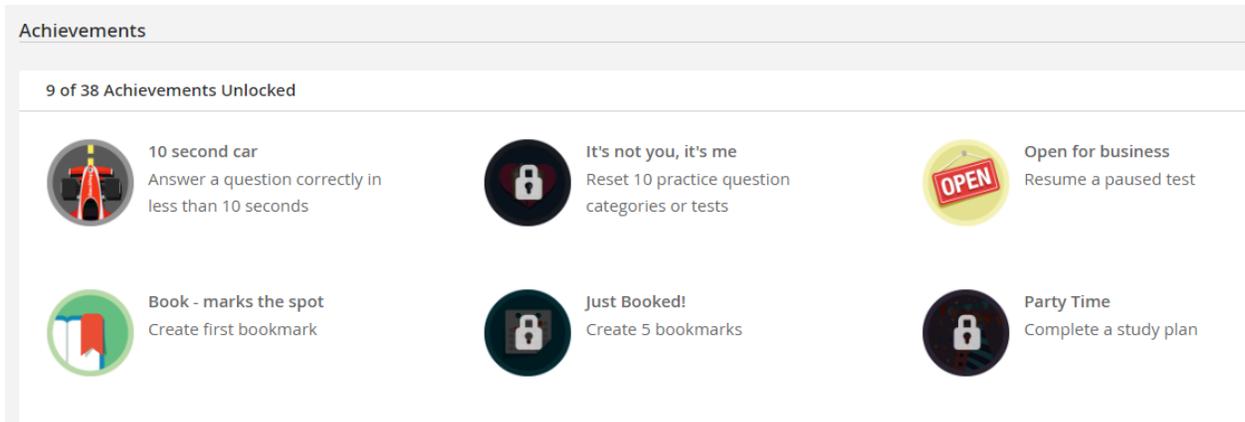

- **Report errors:** Error reporting is now built into each question so that users can submit issues for quick resolution.

◄ ▶ | Question 1 of 100

Which of the following is NOT a basic component of computer hardware?

A. Input
B. Storage
C. Processor
D. Operating system

The correct answer is D. An operating system is not a component of computer hardware. It is a type of computer software. The computer's operating system controls all of the computer's activities.
